

Intercept X for Server

Intercept X Advanced for Server, Intercept X Advanced for Server with XDR and Intercept X Advanced for Server with MTR

Sophos Intercept X for Server secures your cloud, on-premises and virtual servers from the latest cybersecurity threats.

Sophos Intercept X for Server employs a comprehensive, defense in depth approach to server security. A combination of powerful defensive techniques and visibility capabilities give organizations the very best protection against the latest threats.

Stop Unknown Threats

Deep learning AI in Intercept X for Server excels at detecting and blocking malware even when it hasn't been seen before. It does this by scrutinizing file attributes from hundreds of millions of samples to identify threats without the need for a signature.

Block Ransomware

Intercept X for Server includes advanced anti-ransomware capabilities that detect and block the malicious encryption processes used in ransomware attacks. Files that have been encrypted will be rolled back to a safe state, minimizing any impact to business productivity.

Prevent Exploits

Anti-exploit technology stops the exploit techniques that attackers rely on to compromise devices, steal credentials and distribute malware. By stopping the techniques used throughout the attack chain Intercept X for Server keeps your organization secure against file-less attacks and zero-day exploits.

Control Your Servers

Ensure only what you want can run. Server Lockdown (whitelisting) makes sure that only applications you have approved can run on a server. File Integrity Monitoring will notify you if there are unauthorized attempts to change critical files.

See Your Wider Cloud Environment

Understand and secure your entire multi-cloud inventory. You can detect your cloud workloads as well as critical cloud services including S3 buckets, databases and serverless functions, identify suspicious activity, spot insecure deployments and close security gaps.

Highlights

- Secures cloud, on-premises and virtual server deployments
- Stops never seen before threats with deep learning AI
- Blocks ransomware and rollback files to a safe state
- Prevents the exploit techniques used throughout the attack chain
- Answers critical IT operations and threat hunting questions with XDR
- See and leverage firewall, email and other data sources*
- Understand and secure your wider cloud environment such as S3 buckets and databases
- Provides 24/7/365 security delivered as a fully managed service

**Sophos Mobile XDR integration coming soon*

SOPHOS

Extended Detection and Response (XDR)

Sophos XDR gives organizations the tools to quickly answer critical threat hunting and IT operations questions. It goes beyond traditional Endpoint Detection and Response (EDR) by integrating network, email, cloud and mobile data* in addition to endpoint and server. For example, identify servers that have active RDP sessions or analyze cloud security groups to identify resources exposed to the public internet.

**Sophos Mobile XDR integration coming soon*

AI and Expert Powered Data

Combining deep learning AI and the cybersecurity knowledge of SophosLabs experts, Intercept X for Server gives organizations the best of both worlds with industry leading threat intelligence.

Managed Threat Response (MTR)

24/7/365 threat hunting detection and response service that's delivered by a team of Sophos experts. Sophos analysts respond to potential threats, look for indicators of compromise and provide detailed analysis on events including what happened, where, when, how and why.

Straightforward Management

Intercept X for Server is managed via Sophos Central, the cloud-management platform for all Sophos solutions. It's a single pane of glass for all of your servers, devices and products, making it easy to deploy, configure and manage in cloud, on-premises, virtual and mixed deployments.

Technical Specifications

For the latest information please read the [Windows](#) and [Linux](#) system requirements. For details on Linux functionality see the [Linux datasheet](#).

Features	Intercept X Advanced for Server	Intercept X Advanced for Server with XDR	Intercept X Advanced for Server with MTR Advanced
Foundational protection (inc. app control, behavioral detection, and more)	✓	✓	✓
Next-gen protection (inc. deep learning, anti-ransomware, file-less attack protection, and more)	✓	✓	✓
Server controls (inc. Server lockdown, file integrity monitoring and more)	✓	✓	✓
CSPM (Cloud Security Posture Management – see and secure your wider cloud environment)	✓	✓	✓
XDR (Extended detection and response)		✓	✓
Managed Threat Response (MTR – 24/7/365 threat hunting and response service)			✓
