

Avast Business Antivirus

Advanced antivirus protection for all devices

Antivirus is the first line of defense against today's cyberthreats so it needs to be powerful. Avast Business Antivirus is an award-winning, full-featured antivirus solution for small and medium-sized businesses that keeps devices protected from today's sophisticated cyberthreats – whether it's a known ransomware variant or a never-seen-before, zero-day attack.

Block cyberthreats from entering your network

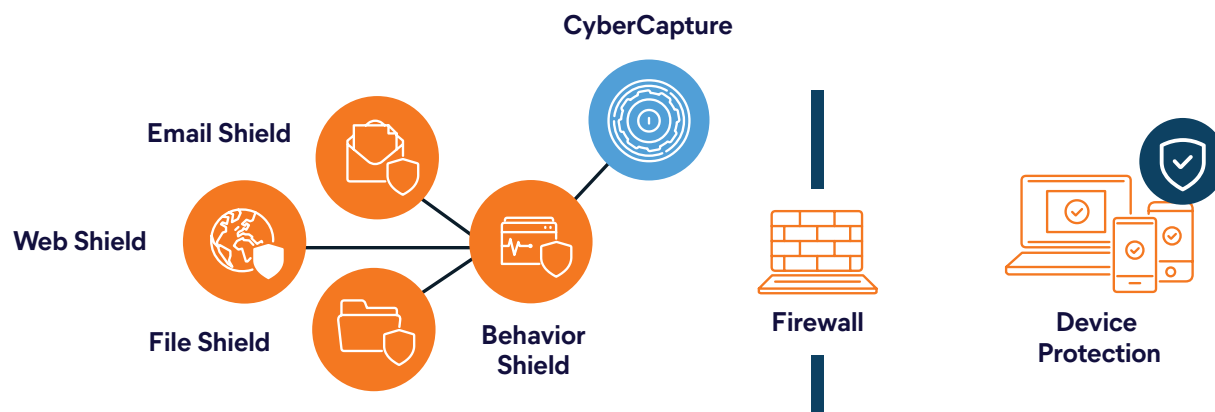

Our Web, File, Mail, and Behavior Shields work together to actively analyze suspicious information coming and going from devices and block malicious files, dangerous websites, unusual behavior, unauthorized connections, and other threats.

Protect against zero-day attacks

All new, unknown, and rare malware variants found by our four-shield defense system are quarantined by CyberCapture, our proprietary technology that quickly scans suspicious files for deeper analysis in a safe cloud environment.

Predict and identify new threats

400 million+ active users in our network provide a continual stream of data that helps us quickly identify and destroy any threat – and predict future ones. Across the globe, our immense cloud-based machine-learning engine is evolving and learning, making our solutions smarter, faster, and more powerful than ever.

Features

File Shield

Scans any file that is opened or downloaded to make sure it's malware-free.

Web Shield

Checks web URLs and certificates to ensure they're safe before a network connection is made.

Mail Shield

Inspects both incoming and outgoing emails to ensure they are completely malware-free.

Behavior Shield

Looks for suspicious behavior in programs installed on devices that may indicate malicious code.

CyberCapture

Detects and analyzes suspicious files in a safe, virtual environment.

Firewall

Monitors all network traffic between PCs and the outside world to prevent unauthorized communication.

SmartScan

Scans for malware, outdated applications, unsafe settings, and suspicious add-ons.

Sandbox

Lets users run applications, download files, and visit websites in a virtual environment that is isolated from the computer.

Wi-Fi Inspector

Scans networks for vulnerabilities, checks network, device, and router settings, and identifies threats.

Real Site

Protects against DNS hijacking to ensure the correct website is displayed.

Rescue Disk

Boots up a PC that's been infected with malware from a USB that contains a clean version of the system.

Security Browser Extension

Scans websites for reputation and authenticity, blocks ads, and puts devices in super-safe mode for additional privacy.

Remote Access Shield

Choose who can remotely access your computer and block unwanted connections to prevent Remote Desktop Protocol (RDP) exploits and brute-force attacks.

Available as standalone or with the management console.

Standalone Antivirus

Ideal for small and medium-sized businesses with four devices or fewer. Users can adjust device settings according to their preferences and maintain complete control of the data.

On-premise or Cloud Management Console

The management consoles makes it easy to deploy antivirus protection to multiple devices, manage all devices from one platform, schedule regular scans, and quickly add more devices.

About Avast Business

Avast delivers all-in-one cybersecurity solutions for today's modern workplace, providing total peace of mind. Avast provides integrated, 100% cloud-based endpoint and network security solutions for businesses and IT service providers. Backed by the largest, most globally dispersed threat detection network, the Avast Business security portfolio makes it easy and affordable to secure, manage, and monitor complex networks. Our easy-to-deploy cloud security solutions are built to offer maximum protection businesses can count on.
