SmartPro UPS, Lithium Battery Backup - 120V 3kVA Line Interactive, 2U, Sine Wave, LCD

MODEL NUMBER: **SMART3000RM2UL**

3kVA UPS system with LiFePO4 battery protects equipment against damage and data loss due to brownouts, spikes and surges.

Features

Reliable LiFePO4 Battery Backup Offers Longer Life and Less Weight than Lead Acid Battery This Tripp Lite SmartPro® UPS system features a state-of-the-art lithium iron phosphate (LiFePO4) internal battery with longer life, more cycles and faster recharge. It more than doubles the service life of an equivalent lead acid battery, and offers up to three times more charge/discharge cycles. It recharges to 100-percent capacity in less than two hours, making the lithium UPS system an ideal backup in case of power outage. The LiFePO4 battery weighs 60-percent less than an equivalent lead acid battery, which reduces the overall UPS weight.

120-Volt Battery Backup Keeps Equipment Operating Through Short Power Failures The SMART3000RM2UL provides up to 9.5 minutes (half load) and 3.5 minutes (full load) of battery backup, as well as AC power protection, for critical server, network and telecom equipment. In case of a prolonged blackout, the single-phase UPS system gives you enough time to save important data and perform an orderly system shutdown. With a 2250W capacity (3000VA), the line-interactive UPS system with automatic voltage regulation (AVR) maintains regulated 120V nominal output over an input range of 83V-145V without using battery power.

Protect Your Mission-Critical Rack Equipment Plug your equipment into the eight NEMA 5-15/20R and one NEMA L5-30R outlets. Two 5-15/20R outlets are switchable, allowing you to power connected equipment on and off remotely to reset or reboot connected equipment or to shed less significant loads to extend battery runtime for more critical equipment. All nine outlets are protected by 570-joule network-grade surge protection to fight off damaging power surges and spikes.

High Efficiency Operation Helps the Environment and Your Cash Flow Operating with a high 98% line-mode efficiency, this 3kVA UPS system can save BTU heat output and energy costs.

Advanced Communications Ports Connect to Any Workstation or ServerUSB and DB9 ports (cables are included) enable data-saving unattended shutdown when used with Tripp Lite's free downloadable PowerAlert® software. Capabilities include monitoring of equipment load level, self-test data and utility power conditions. The Emergency Power Off (EPO) interface offers options for instantaneous power-off of the UPS system and connected equipment in case of fire or other facility emergency. The SMART3000RM2UL is compatible with Tripp Lite network management cards, such as WEBCARDLX, for detailed monitoring of UPS and site power conditions.
