RMCARD201 Remote Management Card

Remotely manage, monitor and control your UPS from a web browser or NMS.

The CyberPower RMCARD201 is a full-featured network UPS management device that remotely manages, monitors, and controls your CyberPower UPS products.

It is an internal card that allows remote monitoring and control of a UPS via Web Browser or NMS. By utilizing the auto-shutdown software, servers and workstations stay protected from data loss due to power failure. Event log in software traces history of the UPS operational history. Security management also provided.

A Three-Year Warranty ensures that this network management card has passed our highest quality standards in design, assembly, material and workmanship.

Features

- Real time UPS monitoring
- Remote management and configuration of UPS via Web Browser or NMS
- Automatic events notification via SNMP Trap
- Event Logging
- Supports TCP/IP, UDP, SNMP, HTTP protocol
- Security Management

RMCARD201 Remote Management Card

Remotely manage, monitor and control your UPS from a web browser or NMS.
